

Press Release

Dear councilmember,

My organization Angels for vets would like to first thank your office for your support to Utah's war veterans.

The aim of AFV(Angels For Veterans) is to educate our local community on exactly what PTSD is and how to identify and recognize it. Our goal is to empower our community with the fact that since our troops fought for us, we now must fight for them. Our foremost concern is our veterans of war. Using a forum that focuses on all those affected by this disorder, our group AFV provides a listing of many support resources available locally and nationally. These resources include guidance for the families, friends, coworkers, and neighbors of our soldiers returning home.

Angels for vets is an information support service of the Department of Veterans Affairs. We recently conducted a research project to investigate the degree of services, support, and, community awareness of PTSD afflicted war veterans in our community. To our relief we found that the Salt Lake County where our organization is based is well-equipped for the ever-growing number of returning home that diagnosed with PTSD.
